

PlayTowers Warranty

Apollo Sunguard Systems, Inc. warrants all structures sold. In addition to the standard warranty and as further indication of our quality, Apollo Sunguard Systems, Inc. will assume responsibility for any playground damage resulting from a PlayTower.

The PlayTower must be installed per factory specifications and installed by a certified PlayTower installer. In addition, the PlayTower must be inspected and certified by a Certified Playground Safety Inspector (CPST). Failure to meet any of the above-mentioned criteria voids this warranty.

PlayTowers are designed for 120 mph winds; however, in most storms there is a strong possibility of microbursts exceeding design specifications. Therefore, the PlayTower cover must be removed in winds 75 mph or greater.
